

Kinematics A Treatise on the Modification of Motion, as Affected by the Forms and Modes of Connection of the Moving Parts of Machines

Filesize: 5.91 MB

Reviews

This ebook is worth acquiring. Better then never, though i am quite late in start reading this one. You will not truly feel monotony at at any time of your own time (that's what catalogues are for about if you ask me).

(Lorenz Vandervort)

KINEMATICS A TREATISE ON THE MODIFICATION OF MOTION, AS AFFECTED BY THE FORMS AND MODES OF CONNECTION OF THE MOVING PARTS OF MACHINES

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 102 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1889 Excerpt: . . . in rolling contact with the spiral AP, which being taken as the describing line, will carry the pole P in the right line PA with uniform velocity. But we have already seen that such motion of P will simultaneously trace upon the planes of the two wheels, the involutes AH and AI of the base circles. And in like manner it may be shown that the continuations J. and AK of these involutes may be generated by the similar and equal spiral ANQ, rolling in contact with the pitch circles, its pole Q being the tracing point. CHAPTER X. SPUR GEARING--CONTINUED. Conjugate Teeth. Sangs Theory. Path of Contact. Unsymmetrical Teeth Approximate Forms. The Odontographs. Diametral Pitch. Manufacture of Gear Cutters. Determination of Series of Equidistant Cutters. Conjugate Teeth. 280. It follows from the general principles stated in (181), that if a tooth-outline of any reasonable form be assumed, it may be generated by some describing curve rolling upon the pitch circle; and if that describing curve be determined, and used in connection with any other pitch circle, the tooth thus formed will evidently gear correctly with the assumed one. Teeth thus related are said to be conjugate to each other; since had the second one been given, the application of the above process would have resulted in the formation of a tooth identical with the first. Now it may be required to lay out a wheel to gear with one already made; and supposing the original...
