Diasporic Africa presents the most recent research on the history and experiences of people of African descent outside of the African continent. This broader view allows for a more comprehensive approach to the study of the African diaspora. The volume provides an overview of African diaspora studies and features as a major concern a rigorous interrogation of identity. Other primary themes include contributions to western civilization, from religion, music, and sports to agricultural production and medicine, as well as the way in which our understanding of the African diaspora fits into larger studies of transnational phenomena.
