Reviews

Thorough information! Its this type of great go through. It is amongst the most incredible publication i actually have read through. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Germaine Welch)

GEOLOGICAL SURVEY BULLETIN VOLUME 1482 (PAPERBACK)**DOWNLOAD**

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. Excerpt: .cylinders are sharply defined in the host basalt containing sparse scattered vesicles. There is no gradation between the vesicular texture of the cylinders and the diktytaxitic texture of the host basalt. The fine-grained dark flows do not contain vesicle cylinders. UPPER PART (THE TOGIK TUYA) In addition to the widespread flows, the Togiak Basalt forms an unusual and prominent butte. The shape, location, composition, and structure of this butte indicate that it was a subglacial volcano. Volcanoes of this type have been recognized in Iceland (Sigvaldason, 1968, Jones, 1969, 1970) and in British Columbia, where Mathews (1947) defined them as tuyas. The Togiak tuya, 6 km by 2.5 km, is an isolated rectangular volcano that erupted from or near the Togiak fault near the east side of the Togiak River valley (fig. 1). It is elongate northeastward parallel to the regional structure and to the flow of glacial ice. The sides are steep to precipitous except at the southwest end, where the slope is Figure 1.--Generalized geologic map of lower part of Togiak River valley, southwestern Alaska, showing location of type and reference sections and distribution of Togiak Basalt. Unconsolidated deposits and plutonic rocks not shown. Fault Approximately located # Volcanic vent e Type section X Reference Section Figure 1.--Continued. Table 1.--Chemical analyses of the Togiak Basalt Rapid-rock analysis by method of Shapiro 1975, p. 43-54). Analyst: Hezekiah Smith. From Hoare and Coonrad. 1978a. p 199 M124635W M124639W-M124638W moderate. The top of the tuya, about 300 m...
