Brand New Book ***** Print on Demand *****.Excerpt from Instruction in Physiology for School Teachers The following extract from the first lecture of the course for which the succeeding Laboratory Notes were written, will serve to explain with what object and upon what plan the Teachers Class was organized. It has of late years come to be pretty generally recognized that no scheme of elementary education is complete which does not include instruction in the elements of some of the experimental and observational sciences, so that, side by side with training in the principles of language and of mathematics, training in these other subjects, which are calculated to exercise different powers of the mind, may find a place. Some sort of teaching in them is therefore commonly attempted in schools, and in spite of great difficulties is often excellently accomplished; and there are now, I think, few teachers of experience who do not recognize their value, or who have not (as one advantage at least) found that many children who seemed hopelessly dull and indolent in the study of other subjects have, when brought...
